

LIST OF PLUMBING SERVICES PROVIDED

- **Water Supply Systems**
 - Design and installation of potable water systems
 - Cold and hot water distribution for residential, commercial, and industrial projects
 - Water pressure boosting systems
- **Sanitary Plumbing Systems**
 - Design and installation of sanitary fixtures and appliances
 - Efficient drainage systems for waste and soil disposal
 - Integration of sanitary systems with greywater and rainwater harvesting
- **Wastewater and Sewerage Systems**
 - Design of wastewater collection, treatment, and disposal systems
 - Design and installation of underground drainage and sewer networks
 - Sewage treatment plants for onsite waste management
- **Rainwater Harvesting Systems**
 - Design and installation of rainwater collection and storage systems
 - Integration of rainwater systems with plumbing for water reuse
 - Efficient stormwater drainage solutions
- **Greywater Recycling Systems**
 - Design and installation of greywater collection and filtration systems
 - Recycling of greywater for irrigation and non-potable uses
 - Sustainable water reuse systems
- **Hot Water Systems**
 - Design and installation of centralized and decentralized hot water systems
 - Solar water heating solutions for energy efficiency
 - Heat recovery systems for hot water generation
- **Sustainable Water Solutions**
 - Plumbing designs that support LEED and EDGE certification
 - Water conservation strategies, including low-flow fixtures and fittings

- Integration of smart water management systems for monitoring and optimization
- **Pump and Piping Systems**
 - Design of pump stations for water supply and drainage
 - Pressurized piping systems for efficient fluid distribution
 - High-capacity piping for industrial applications
- **Backflow Prevention and Water Safety**
 - Installation of backflow prevention devices to protect water supply systems
 - Water quality management and safety compliance
- **Stormwater Management Systems**
 - Design of stormwater drainage to prevent flooding and manage runoff
 - Installation of permeable pavements, retention basins, and other stormwater solutions
- **Maintenance and Upgrades**
 - Routine maintenance of plumbing and drainage systems
 - Retrofitting and upgrading of systems for improved performance and efficiency
